VALUE ADDED CAPTAIN'S STAND ASSEMBLY INSTRUCTIONS

101122*

Congratulations on your purchase of one of the many fine SIGNATURE SEATING products available through your local dealership. We have worked hard to simplify the installation of this Captain's Stand.

FOLLOW THESE SIMPLE STEPS:

STEP ONE

Open the box and pull out the Captain's Stand. (Do not use a knife or anything that may damage the contents of the box.) Place the Captain's Stand upright on a flat surface.

STEP TWO

Take the bottom foot pad completely off with a phillips screw driver.

STEP THREE

Directly below the place the step pad was mounted, press lightly to locate two 1" holes bored under the vinyl cover.

STEP FOUR

Cut a slit the width of the hole. (Be careful not to make a hole too large for the pad to cover.) This hole provides access to the rear mounting board.

STEP FIVE

Take off the rear door off by removing the four (4) phillips screws with the snap sockets. (This provides access to the front mounting holes, and easy installation of the steering assembly, lights and any other accessories.)

STEP SIX

Position the Captain's Stand in the boat where you want it to be permanently mounted. Bore through the floor mounts using the front mount. Mount to the floor securely with either lags or bolts, depending on the floor material. Use a minimum of 4 fasteners (2 front and 2 rear) to mount the stand to the floor of the boat. (SPECIAL NOTE: See your dealer for the proper size and type of fastener for your particular application.)

STEP SEVEN

When the Captain's Stand is mounted securely, and the steering assembly, lights, and other accessories are installed, the rear door and foot pad can be reinstalled. Snap the four (4) trim buttons in the bag kit over the snap studs on the rear door.
