

FURNITURE MEASUREMENTS | HELPFUL HINTS

How to Measure Pontoon for Furniture:

- Please measure accurately to avoid costly returns. Pontoon Specialists will not pay the return shipping when your furniture does not fit correctly.
- For rear groups, measure the inside to inside of the railing across the back of the pontoon (see **A** on [Illustration 1](#)).
- If you are purchasing a rear corner L group, measure from the back of your pontoon to side door (see **B** on [Illustration 1](#)).
- For measuring front groups, measure from the front rail to the door (see **C** on [Illustration 1](#)), and measure from the side rail to the door (see **D** on [Illustration 1](#)).
- * **Our Premium, Platinum and Luxury Furniture Groups on our website list the overall “Minimum Dimensions” to place that specific group on your pontoon. If you would like a more detailed measurement, please see each individual furniture piece in the appropriate furniture group.**

Dimensions need to be taken inside the railing.
Stopping point for measurement should be the door
or anything which would prohibit the installation
of the furniture - remember rail supports!
