

## AQUA-TREAD MARINE FLOORING CARE & CLEANING

Aqua-Tread Marine Flooring is easily washed with mild soaps and other household detergents suitable for vinyl material. Brush or sweep with cool water using a deck brush or soft to medium stiff brush. Apply soap or cleaner to penetrate the dirt/stain for 2-3 minutes. Next lightly scrub the area and rinse off the flooring. Should this not get the entire affected area completely clean, repeat cleaning again. This should take care of 95% of any flooring dirt and grime. Should you need to get more aggressive on some stains the cleaning products below have been tested on our material and they should take care of any other affected areas. Follow the cleaning instructions on those products. Never leave harsh detergents or chemicals on the material without cleaning off the residue.

Vinyl's are not stain-proof materials. Certain dyes, inks, rubber based material, chemicals and tannin based leaves may cause permanent staining. Some non-permanent stains can be removed with the vinyl floor cleaners listed below. Never use harsh chemicals such as tar removers, acetone, kerosene or Oxalic acid based cleaners on this product.
