

Blue Water Pontoon Tops – FAQ's

Q: Why should I buy a Blue Water Pontoon Top?

A: Covering your pontoon is the worst part of boating. Bluewater Tops solve that problem affordably.

Q: Will I ever see this sold on OEM pontoons?

A: Yes, Apex Marine sells our Bluewater Tops.

Q: Can your top be used in place of a full mooring cover or lift canopy?

A: Yes. This system does a very decent job of protection while at the dock with very little effort needed.

Q: I like your top, but how will we get any sun when wanted?

A: We offer a sun roof option that may be opened to allow enough direct sunlight in, to enjoy a great summer day.

Q: Will your top be too dark on our early evening cruises as observed from our seating configuration?

A: No. The light source is actually quite adequate, but we do offer a lighting package to enhance your cruise and add to the ambiance.

Q: Can we really install this top ourselves?

A: Yes. This is a well thought out pontoon top system, installed with basic tools, accompanied with good written direction and a how-to video.

Q: Do I have to buy a full length top?

A: No. This top system is sold in many lengths and two widths to allow you to customize to your needs.

Q: If we prefer to have our top installed can you do this?

A: Yes. We offer installation at our facility, but most people may be out of our reach.

Blue Water Pontoon Tops – FAQ's

Q: Okay, then what do we do?

A: Most full marine dealers with all of the information we provide before purchase can take a look at our product and install it for you.

Q: How much is shipping?

A: Shipping is based on your location. Please call us for a shipping quote.
