

HELPFUL HINTS – VINYL EXPLANATION

NON-WOVEN VERSUS EXPANDED

What is Weight? It depends if you put it to work for the performance of the product. Some products add weight as filler to merely advertise a heavier product. We put the weight to work. Working surface refers to the film that is the component of a vinyl coated fabric, which provides scuff and abrasion resistance. With 14 mil of film you get nearly double the working surface of other products. The invisible topcoat and automotive color pigments resist fading and discoloration from the sun's brutal rays.

Use what the marine Original Equipment Manufacturers (OEM) have used for 30 years, not a cheap imitation. Three quarters of a vinyl's life is dependent on the care and cleaning of the vinyl.

For the correct way to clean vinyl go to:
